INFORMATION AND METHODOLOGICAL SUPPORT FOR THE ANALYSIS OF THE ORGANIZATIONS LABOR RESOURCES

A significant contribution to the study of theoretical, methodological and practical issues of the analysis of labor resources was made by such famous scientists as A.D. Sheremet, G.V. Savitskaya, M.I. Bakanov, S.A. Boronenkov, V.V. Kovalev, M.A. Vakhrushina, G.N. Gogina, N.P. Lyubushin, M.V. Miller, and others.

The analysis of labor resources makes it possible to find reserves for increasing production efficiency at the expense of labor productivity, namely, a more rational use of the number of workers and their working time.

The main purpose of the work is to substantiate the theoretical and methodological provisions and develop practical recommendations for expanding the methodological foundations of the analysis of the organizations labor resources.

To achieve the goal, the following tasks have been identified:

Currently, the analysis of labor resources is widespread both in domestic practice and abroad. Nevertheless, the tough conditions of competition, the striving of each organization to maximize profits require the improvement of the methodological foundations of the analysis of the organizations labor resources.

- determine the main goals and objectives of the analysis of the organizations labor resources

- to analyze the composition, structure, dynamics, efficiency of use of labor resources in the organization

- to reveal the methodology for analyzing the organizations labor resources and the effectiveness of their use

- explore the concept and regulation of labor resources

- to develop the main measures aimed at increasing the efficiency of the use of labor resources in the studied organization

The theoretical significance of the study is to improve certain provisions in the field of analysis of the organizations labor resources.

The practical significance of the work lies in the fact that the main results of the research can be used in the activities of organizations.
